Collaboration

Cross-functional stakeholders Client training KPI reporting Customer service leadership

PROFESSIONAL EXPERIENCE

Application Support Engineer | Made4net — Teaneck, NJ, USA

Oct 2024 – Present

- Own advanced troubleshooting and root-cause analysis for enterprise WMS clients, restoring production issues with minimal warehouse downtime.
- Investigate SQL database failures, API integrations, ERP connections, and system workflows to resolve mission-critical incidents against SLA.
- Support go-lives, upgrades, UAT validation, and production monitoring so clients cut over without disrupting daily operations.
- Provide rotating 24/7 on-call coverage with proactive client updates during high-severity events.
- Built an Excel-to-SQL converter (MSSQL, MySQL, PostgreSQL) to speed bulk data loads and reduce conversion errors.

Technical Solutions Engineer | LVMH Perfumes & Cosmetics — New Jersey, USA

Jul 2023 – Aug 2024

- Supported Salesforce Commerce Cloud for LVMH brands including Dior, Fresh, Givenchy, Make Up For Ever, Guerlain, Benefit, and Stella McCartney.
- Primary technical liaison for US and Canada digital applications, coordinating incidents with Paris HQ and vendor IT teams.
- Monitored order, shipment, and returns flows; escalated recurring breaks before they became systemic failures.
- Managed KPI dashboards and weekly RUN reporting for technical stakeholders and the Senior Domain Manager.
- Partnered with commercial and IT teams so technical fixes matched business priorities, not only ticket closure.

Technical Solutions Engineer, Retail Media | Criteo — New York, NY, USA

Aug 2022 – Jul 2023

- Supported retail media clients by troubleshooting live campaign performance, tracking, and technical integrations.
- Tested client implementations, reported product bugs, and worked with escalation and R&D through to resolution.
- Improved internal processes and tools so Technical Solutions could partner with commercial teams, not only work the ticket queue.

Web Developer | BMS Logistic — Newark, NJ, USA (Remote)

Jan 2021 – Aug 2022

- Developed and maintained web applications in React, Node.js, HTML, CSS, and JavaScript, including new features on the company site.
- Improved performance and responsiveness so interfaces stayed usable across devices.

Gate Lead | Worldwide Flight Services — Newark, NJ, USA (El Al & Air China)

Feb 2018 – Jan 2021

- Led passenger check-in, boarding, and gate close-out for international flights; resolved real-time issues in a high-volume, time-critical operation while keeping airline and airport compliance intact.
